To whom it may concern:

Bob Pakrul and the team at Spotless did an excellent job of limiting the water damage that Providence Academy faced after an early morning week-end fire, last summer. The fire damage was minimal, but the potential for water damage was great. Two sprinkler heads went off and discharged 40 gallons of water per minute. By the time the fire department arrived, the stairwell was a waterfall, we had a couple inches of water throughout the hallway (on that end of the building) and water was all over the science room, the library, a portion of the gym and a number of other classrooms. The key to the situation was to respond quickly and to minimize the impact of the water damage.

Bob and his team arrived very quickly, and promptly went to work with a variety of types of equipment that helped minimize the damage.

The team at Spotless is well equipped, well-versed in the latest technologies for minimizing water damage and they are quick to arrive.

Hopefully, you will never encounter this type of situation, however if you do, I would give Bob and the team at Spotless a strong recommendation for their excellent service.

Sincerely,

Jerry Williams, School Administrator
Providence Academy
